Syndron UI – Next.js Documentation

Syndron UI is a modern admin dashboard built with Next.js 16, React 19, Tailwind CSS 4, TypeScript, and ShadCN UI. This documentation helps you install, run, customize, and deploy the template.

Requirements

• Node.js 20+
• npm, pnpm, or yarn
• Modern browser

Installation

1. Extract the downloaded package.
2. Open terminal inside the project folder.
3. Run: npm install
4. Start development server: npm run dev
5. Open http://localhost:3000

Production Build

npm run build
npm run start

Project Structure

app/ – Next.js App Router pages
components/ – Reusable UI components
hooks/ – Custom hooks
lib/ – Utility functions
providers/ – Theme and application providers
public/ – Static assets

Technologies

• Next.js 16
• React 19
• Tailwind CSS 4
• ShadCN UI
• TypeScript
• Lucide Icons
• Recharts

Customization

Update colors in globals.css.
Modify sidebar navigation from navigation configuration files.
Customize dashboard widgets inside components directory.

Dark Mode

Dark mode is powered by next-themes and supports system theme detection.

Deployment

Recommended deployment platform: Vercel.
The template can also be deployed on Netlify, VPS servers, Docker, and other Node.js hosting providers.

Support

Website: https://codervent.com
Product: Syndron UI – Next.js Edition
